1.0 Summary and Limitations

This presents the summary and limitations for a Phase I Environmental Site Assessment (Phase I ESA) for the parcel at the following location, hereafter also referred to as the Study Site:

APN: 046-223-018

8841 Old Redwood Hwy, Cotati, CA 94931

The approximate Study Site location is shown on the attached Site Location Map, Plate A and Assessor Map, Plate B.

The format of this report is based upon the guidelines of the American Society of Testing and Materials (ASTM) 1527-21 Standard Practice for ESAs, All Appropriate Inquiries (AAI).

A Phase I ESA looks for the following conditions:

Recognized Environmental Condition (REC): the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions. A de minimis condition generally does not present a threat to human health or the environment and generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

Controlled REC: a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

Historical REC: a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

The judgments, conclusions and recommendations described in this report pertain to the conditions judged to be present or applicable at the time the work was performed. Future conditions may differ from those described herein, and this report is not intended for use in future evaluations of the Study Site unless a qualified professional conducts an update.

TTC did not evaluate the presence of suspected asbestos containing materials, lead paint, radon, or polychlorinated biphenyls (PCBs) in light ballasts, as this was outside of our scope.

This Phase I ESA is limited to the data referenced herein, which was derived within the scope, budget, time, and other limitations for this project. Certain information contained in this report was provided to TTC by third parties or other outside sources.

TTC does not make any warranties or representations, whether expressed or implied, regarding the accuracy of such information, and will not be held accountable or responsible in the event that any inaccuracies are present. This report should not be construed as a guarantee that all environmental liabilities associated with the property are included herein. If additional information is required, an additional investigation could be carried out. TTC would need to prepare a cost estimate for additional services and obtain written authorization prior to proceeding with any additional work for this project.

This Phase I ESA has revealed no RECs, Controlled RECs, or Historical RECs in connection with the Study Site.

This report is provided for exclusive use by representatives of Brian Flahavan (Client). Use by a third party requires written authorization from TTC and Client.

1.1 Significant Assumptions

The Phase I ESA and AAI are intended to assess the environmental conditions of the referenced specific property. Under the AAI rule, a Phase I ESA alone does not provide the landowner with protection against CERCLA liability. Rather, it reflects a commercially prudent and reasonable inquiry designed to recognize environmental conditions in connection with a property. Failure to identify an environmental condition during an AAI does not relieve the landowner from complying with the statutory requirements for obtaining liability protections.

1.2 Limitations of Assessment

The conclusions regarding this property are based on observations of existing conditions and our interpretation of site history and site usage data. This service has been performed in accordance with generally accepted environmental assessment practices for similar Phase I ESAs conducted at this time and in this area. The results of this study are qualified by the fact that no drilling, sampling, or analytical testing was performed on the Study Site by TTC for the preparation of this report. Therefore, the conclusions presented do not represent a warranty that all areas within the Study Site are of the same quality as may be inferred from observable site conditions and readily available site history.

The findings of this Phase I ESA do not preclude the existence of contaminants in the soil or groundwater below the Study Site which may not have been discovered by the limited audit methods used in this study.

While we consider work of this type to be valuable in the preliminary evaluation of potential hazardous materials or waste at the Study Site, this assessment may not because of the limited nature of this assessment, this report is not a risk assessment and the scope of services does not include a determination of the extent of business environmental risk nor the public health impact of, known or suspected hazardous materials or wastes.

Federal, State, and local databases were accessed through Environmental Data Resources, (EDR) a database information retrieval service, and meet the ASTM E 1527-21 Standard for that requirement. Some local and regional database sources were accessed and/or reviewed directly by TTC personnel. The list of files and databases are summarized in Section 5.0. Although a diligent effort was made to access all relevant files, no guarantee can be made that our file search was all inclusive.

The regulatory agency files and records research included state, county, and local public agencies. The format of this report generally follows the guidelines of the ASTM E 1527-21 Standard Practice for Environmental Site Assessments.

2.0 INTRODUCTION

In performing this Phase I ESA, we researched, reviewed, and evaluated existing available public and regulatory agencies information and identified potential RECs within the study area that could impact the Study Site. Our scope of work included the following:

- Review the Study Site history/land use based on data obtained from representatives of the current owner and agency files;
- Review regulatory agency files and/or databases pertaining to the study area;
- Review study area historical aerial photographs and topographic maps;
- Perform a site walk
- Prepare report summarizing the results of our work.

3.0 User/Owner Provided Information

Please refer to Appendix A for a copy of the User Questionnaire.

3.1 Environmental Liens or Activity and Use Limitations:

There are no environmental liens, activity or land use limitations noted during our research relating to RECs.

3.2 Reason for Performing Phase I:

Use by the owner for development.

3.3 Valuation Reduction for Environmental Issues:

None

4.0 RECORDS REVIEW

4.1 Standard Federal, State, and Tribal Environmental Record Sources:

Please see attached EDR Radius Map and Geo Check Report, dated June 21, 2023, in Appendix B. The Study Site was not listed in any of the agency's records included in the EDR Radius Map.

4.2 Regulatory Agency File and Records Review:

Please refer to Appendix C for a copy of select record review documentation.

Reviews of the files on the State Water Resources GeoTracker website verified the EDR report and local agency file review findings.

A review of the study area on the California Department of Water Resources GeoTracker website indicated no files for the Study Site.

There are 5 sites that underwent a soil and groundwater investigations within the study area; all 5 sites have received closure from the overseeing regulatory agencies.

4.3 Standard Historical Sources

Aerial Photographs

Aerial Photographs

Please refer to Appendix D.

1942 Aerial Photograph.

The single family residence in the center of the eastern portion of the property and one of the chicken coop buildings are present. There is an orchard present in the northwestern corner and the center of the site. The property adjacent to the north is mostly open pastureland and there are two chicken coop structures. The adjacent parcel to the south appears to have the same residence and outbuildings as seen during the May 29, 2014 site visit. Old Redwood Highway is present to the northeast and there is open pastureland with an outbuilding on the property to the northeast of Old Redwood Highway.

1953 Aerial Photograph

There are several more chicken coop structures on the study site in place of the orchards that were seen in the center of the study site. The orchards in the northwest corner of the site are present. The adjacent parcels appear to be the same as the 1942 photo.

1968 Aerial Photograph

The study site appears the same as the 1953 photo, with the exception of fewer trees in the orchard in the northwest corner. The roads between the chicken coops on the site are more pronounced. The adjacent parcels are approximately the same as the 1953 photo.

1975 Aerial Photograph

The photograph quality is poor, no details are readily observable. It appears that the single-story residence in the northeast corner of the study site is now present

1982 Aerial Photograph

Photograph quality is a not clear and the color is washed out. The single-story residence in the northeast corner of the study site is present and the buildings on they appear to be the same as the 1968 photo.

1993 Aerial Photograph

The buildings on the study site appear to be the same configuration as seen during the May 29, 2014 site visit. The residential housing development along Clothier Lane is now present.

1998 Aerial Photograph

The study site and adjacent parcels appear to be the same as seen in the 1993 photograph.

2005 Aerial Photograph

The study site and adjacent parcels appear to be the same as seen in the 1998 photograph, with the exception of the completed residential development on the east side of Old Redwood Highway. These houses are accessed from John Roberts Road.

2009 Aerial Photograph

The study site and adjacent parcels appear to be the same as seen in the 2005 photograph.

More recent aerials available on Google Earth were also reviewed.

Fire Insurance Maps

The Study Site is listed as “unmapped property” on the Sanborn Insurance Maps. A copy of the EDR Fire Insurance Map Report is attached as Appendix E.

Assessor/Title Research

A copy of title documentation provided by First American Title Group attached in Appendix F. A Chain of Title was not requested. No information indicative of an REC was found in the title information reviewed. No environmental liens were found in the title information reviewed.

USGS Topographic Maps

Please see EDR Historical Topographic Map Report, Appendix G

City Directory

The address was not listed. No listings judged to be indicative of RECs were identified in the EDR City Directories for the Study Site. A copy of the EDR City Directory is attached as Appendix H.

4.4 Summary of Study Site Tenants and/or Owners

The property is vacant, no tenants were available on site.

4.5 Previous Reports and Documents

A Phase 1 previously performed by TTC, dated June 19, 2014 was reviewed; no RECs were identified. We built upon the research performed for the previous Phase 1, including title record and former owner contact attempts for the subject report.

5.0 Site Reconnaissance

The site reconnaissance on June 30, 2023. No conditions judged to be indicative of an REC were observed. Please refer to Appendix I for a copy of the site photos. There was evidence of a

5.1 Property and Vicinity General Characteristics:

There are two single story, wood framed, single-family residence located on site. There is an unattached, wood sided garage to the south of the residences. There is an outbuilding to the southwest of the residences.

What appears to be the remnants of chicken coops/outbuildings are located in the southeast portion of the site. .

The adjacent properties appear to be rural residential, undeveloped, or used for agricultural purposes. No conditions judged to be indicative of RECs were identified.

The study site is bounded by the private residences and rural properties.

6.0 INTERVIEWS

6.1 Interview with Owners/Occupants

No conditions indicative of an REC are known by the owner's representative. No environmental liens were identified. Attempts were made to contact previous owners as identified in the June 19, 2014 TTC Phase 1. We performed a title

6.2 Interview with Key Site Manager

Please refer to the User/ Owner Questionnaire attached in Appendix A.

7.0 DATA GAPS

Previous owner interviews prior to 2014 were not available. We could not see all surface areas due to cover and debris, we did not enter all buildings, and the aerial photo resolution may have left some surface features obscured. Based upon the sum of available information, we do not believe if satisfied that the data gaps would likely lead to information that would materially affect our conclusions.

8.0 FINDINGS/CONCLUSIONS

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-21 for the Study Site. No exceptions to, or deletions from, this practice were encountered during the preparation of this Phase I ESA.

This Phase I ESA has revealed no RECs, Controlled RECs, or Historical RECs in connection with the Study Site.

The apparent former site use for raising poultry leads to the potential for the presence of elevated levels of nitrates and potentially abnormal pH levels around the apparent poultry houses. It would be prudent to evaluate the surface soil conditions. We do not expect the residual impact (if present) to be too difficult to remedy with some soil amendments and reworking. Old rural farming properties have been known to have had above ground or underground fuel storage tanks. We found no documentation or evidence of a fuel tank or tanks; farm tanks are exempt from permitting.

9.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

For the purposes of this report, Bill C. Wiggins, P.E. is the Environmental Professional of record.

BILL C. WIGGINS, P.E., CIVIL ENGINEER, PRESIDENT

Registered California Civil Engineer CE46344

Licenses

California Professional Engineer – Civil 46344

California General Engineering Contractor A with Hazardous Materials Certification – 697833

Project Experience Summary

Mr. Wiggins is a licensed professional engineer in the State of California and has been an environmental consultant for over 29 years. Bill founded Trans Tech Consultants with a partner in 1987. He has been in responsible charge of over 1,000 environmental projects, including investigation and remediation projects involving fuel releases and volatile organic compounds in soil and ground water, Phase I and Phase II site assessments, storm water pollution prevention plans, hazardous material management plans, and extensive experience with the California Underground Storage Tank (UST) Cleanup Fund.

An example of the types of projects Bill has worked on includes:

- *Preparation of Site Health and Safety Plans*
- *Investigation in the pathway of proposed utility upgrades.*
- *Underground Storage Tank removal projects.*
- *Investigation of fuel and solvent releases to soil and groundwater*
- *Remediation of fuel and solvent releases to soil and groundwater*
- *Preparation of ASTM compliant Phase I Environmental Site Assessments*
- *Preparation of Storm Water Pollution Prevention Plans*
- *Preparation of Hazardous Materials Management Plans*

APPENDIX A

User/ Owner Questionnaire

**ASTM PHASE ONE ENVIRONMENTAL SITE ASSESSMENT
USER Representative QUESTIONNAIRE**

8841 Old Redwood Highway

APN 146-223-018

(1.) Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).

Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?

 No

(2.) Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).

Are you aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

 No

(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

 No

(4.) Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).

Does the purchase price being paid for this property reasonably reflect the fair market value of the property? YesIf you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

(5.) Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

(a.) Do you know the past uses of the property?

No

(b.) Do you know of specific chemicals that are present or once were present at the property?

No

(c.) Do you know of spills or other chemical releases that have taken place at the property?

No

(d.) Do you know of any environmental cleanups that have taken place at the property?

No

(6.) The degree of obviousness of the presence of likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?

No

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/23/2023 has revealed that there is 1 ENVIROSTOR site within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Lists of state and tribal leaking storage tanks

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 12 LUST sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 SWEEPS UST site within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/06/2023 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 2 CUPA Listings sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

RWQCB Region:
Site History:

NORTH COAST RWQCB (REGION 1)
Excerpt from "Report of Investigation" (EBA Engineering, January 2009) On December 11, 2001, John s Excavating of Santa Rosa, California, removed a 1,000- gallon UST from the southwest portion of the project site. RGH Geotechnical and Environmental Consultants (RGH) of Santa Rosa, California, supervised the UST removal and subsequent excavation under a permit with the Sonoma County Department of Emergency Services. The resulting UST excavation pit measured approximately eight feet wide by 18 feet long and five feet in depth. RGH personnel indicated that the UST was constructed of single wall steel, which had a rusted surface and several small holes. Groundwater was encountered in the UST excavation, however no odors were noted and no sheen was observed on the water surface. Following removal of the UST, one groundwater grab sample and two soil samples were collected for chemical analysis from the UST excavation. The soil samples were collected from each end of the UST excavation sidewalls at approximately five feet below ground surface (BGS). Upon completion of the sampling activities, the excavation was backfilled with excavation spoils, broken concrete slab fragments and clean, imported fill material. Complete details of the UST removal investigation, including analytical results from the soil and groundwater sampling, were presented in RGH s Summa7y Report, UST Removal (RGH, 2002). Findings from UST sampling activities revealed that total petroleum hydrocarbons as diesel (TPH-d) was detected in the groundwater grab sample at a concentration of 420 micrograms per liter (igfL). All other remaining petroleum hydrocarbon constituents analyzed in the groundwater grab sample and excavation soil samples were not detected at or above laboratory reporting limits. Based on these findings, EBA was contracted to perform a soil and groundwater investigation on September 8 and 9, 2003. This investigation consisted of the drilling and sampling of three soil borings: SB-1, SB-2, and SB-3 (Figure 2, Appendix A). Soil boring SB-3 was subsequently converted to monitoring well MW-1. Analytical results of groundwater grab samples collected during the drilling activities indicated detected petroleum hydrocarbon impacts to groundwater in all three soil borings. Complete details of this investigation were presented in EBA s Report of Investigation and Sensitive Site Receptor Survey (EBA, 2003). Based on the results of the September 2003 investigation, EBA conducted an additional soil and groundwater investigation on August 2 and 3, 2005 that entailed the advancement of seven soil borings (including SB-5, SB-6 and SB-7) and converting four of the soil borings into monitoring wells (MW-2, MW-3, MW-4 and MW-6). The locations of these soil borings and monitoring wells are shown on Figure 2 in Appendix A. An additional two soil borings and one monitoring well were planned for advancement and installation on the neighboring property to the west, 72 Benson Lane, however, completion of these soil borings and monitoring well could not be conducted as the property owner of 72 Benson Lane would not allow EBA access to this property. Results from soil samples collected and analyzed during the August 2005 investigation indicated that no petroleum hydrocarbon compounds were detected at or above laboratory reporting limits (EBA, 2005). The five original project site monitoring wells (MW-1 through MW-4 and MW-6) have been sampled on a quarterly to annual basis since their installation. Results of the groundwater monitoring activities have indicated detections of TPH as gasoline (TPFI-g), TPH-d, ethylbenzene and total xylenes in groundwater samples collected from MW-1. Benzene and toluene were

historically detected in groundwater from MW-i during several monitoring events within two years of well installation, but have not been detected during any monitoring events conducted since the end of 2005. Petroleum hydrocarbons have generally not been detected at or above laboratory reporting limits in groundwater samples collected from MW-2, MW-3, MW-4, and MW-6, nor from the project site domestic water supply well. Results from groundwater monitoring events have been presented in groundwater monitoring reports, the most recent of which was submitted to the SCDHS-EHD in February 2009 (EBA, 2009a). The SCDHS-EHD requested that an additional monitoring well be installed downgradient of MW-i in a letter dated August 9, 2009. EBA developed a Work Plan (EBA, 2009b) presenting the scope of work for installation of the new monitoring well, which was approved by the SCDHS-EHD in a letter dated October 15, 2009. Additional notes by SCEHS staff. A year of verification monitoring is required. Site closed 8/2/12.

Discharge Source: Tank
Discharge Cause: Corrosion
Stop Method: Close and Remove Tank, Remove Contents
Stop Description: Not reported
No Further Action Date: 12/05/2014
CA Water Watershed Name: Russian River - Middle Russian River - Laguna (114.21)
Dwr Groundwater Subbasin Name: Santa Rosa Valley - Santa Rosa Plain (1-055.01)
Disadvantaged Community: Not reported
CA EnviroScreen 3 Score: 36-40%
CA EnviroScreen 4 Score: 15-20%
Military DOD Site: No
Facility Project Subtype: Not reported
RWQCB Region: NORTH COAST RWQCB (REGION 1)
Site History: The site was put into the Regional Water Quality Control Board after a release was reported from a former 1,500 gal waste oil underground storage tank that was removed on 5/12/1988. Sonoma County uses the site as a road yard. It was also a former burn dump. The site was transferred to Sonoma County Env. Health on 6/30/93. Three monitoring wells were installed to investigate soil and groundwater. Verification monitoring was being conducted when another UST was removed. The investigation of that release has not been completed. Site closed 12/5/14.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/26/2023	Source: EPA
Date Data Arrived at EDR: 05/02/2023	Telephone: N/A
Date Made Active in Reports: 05/17/2023	Last EDR Contact: 06/02/2023
Number of Days to Update: 15	Next Scheduled EDR Contact: 07/10/2023
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/26/2023	Source: EPA

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facility's name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

Number of Days to Update: 76	Next Scheduled EDR Contact: 07/17/2023
	Data Release Frequency: Quarterly

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Trans Tech Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.
